

Environmental Infrastructure Engineering

Associate Professor
Atsushi Takai

Professor
Takeshi Katsumi

Assistant Professor
Tomohiro Kato

Environmental Geotechnics

for more sustainable infrastructure development!!

Environmental Infrastructure Engineering

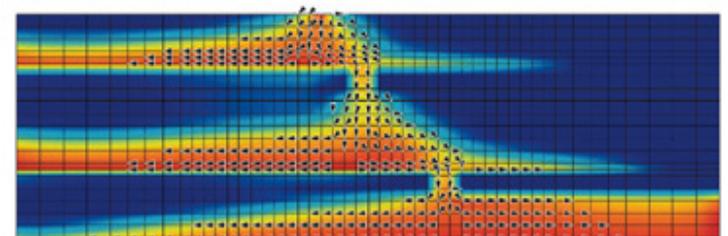

Utilization of waste and by-products

- ✓ Application of excavated soil and rock containing geogenic heavy metals
- ✓ Recovery of disaster waste as geomaterial
- ✓ Design and post-closure utilization of waste landfills

Conservation of geoenvironment

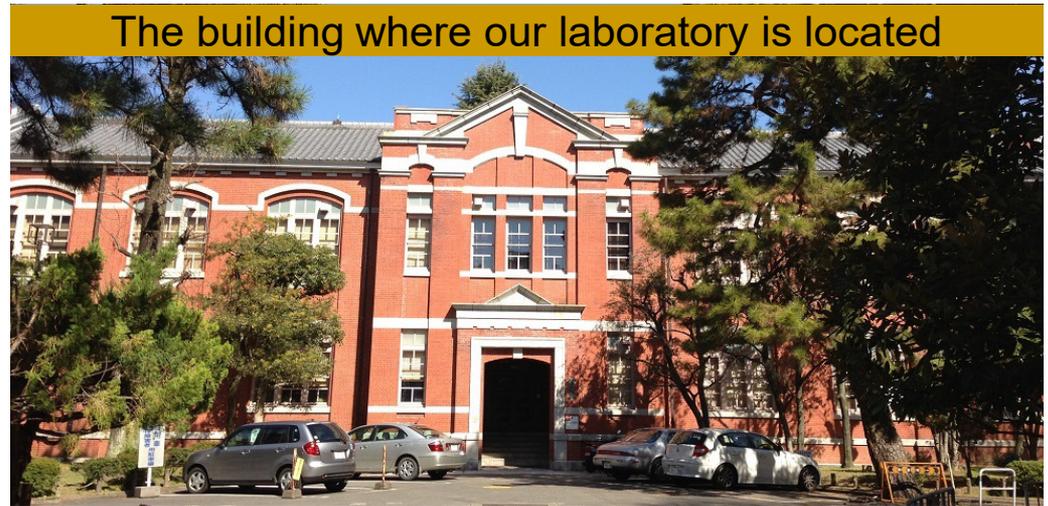

- ✓ Fate and transport of chemicals in the ground
- ✓ Containment and attenuation of ground contamination
- ✓ Effect of climate change on the geoenvironment

Piled disaster waste in
2011 Tohoku Earthquake

Environmental Infrastructure Engineering

- 12 Japanese students + 8 internationals (incl. 1 staff)
From China (6), Myammer (1) and Kenya (1)
- Enough equipments for chemical and mechanical analyses
